

## Abstract of the Disclosure

Ae without causing movement or peeling of the relief film and yet may facilitate the re-sticking thereto. A urethane prepolymer represented the formula [I]:

A-O-CONH-B-NHCO-

$$-\{[\text{O-C}_p\text{H}_q(\text{O-CO-C}_r\text{H}_s\text{CO-O-C}_p\text{H}_q)]_t\text{O-CONH-B-NHCO}\}_u(\text{O-D-O-CONH-B-NHCO})_v-$$
  

$$-\{[\text{O-C}_p\text{H}_q(\text{O-CO-C}_r\text{H}_s\text{CO-O-C}_p\text{H}_q)]_t\text{O-CONH-B-NHCO}\}_u\}_w\text{O-E} \dots [I]$$

polymerizes and cures to make adhesive polymer. The adhesive polymer is used for an adhesive material for fixing a relief film onto a printing base of a printing machine.
